

Leber Orthodontics

Larry Leber DDS, MS • Eric Leber DDS, MS

A Family Tradition

Overview 2007

Leber Orthodontics Opens Rita Ranch / Vail Office

At Leber Orthodontics we are so excited to announce the opening of our second location in Rita Ranch/Vail. The office in Rita Ranch with its upbeat design and new equipment has surpassed our expectations. It is conveniently located on the southeast corner of Houghton and Rita Rd.

Our main office on Alvernon boasts brand new treatment chairs, making our orthodontic delivery system more comfortable and efficient. We are now able to provide quality orthodontic care at these two excellent locations.

Dr. Larry was sidelined for the month of January (2008) with a bi-lateral total knee replacement. With two bionic knees, Dr. Larry is better than ever and provides, as always, that element of experience and time-tested results. With Dr.

Eric's energy, ideas and knowledge of the latest techniques, they are a winning combination. Dr. Eric and Dr. Larry love working together in planning the right treatment strategy for each of our patients.

At both of our Leber Orthodontics locations, we pride ourselves on being a patient-friendly office with a talented and caring staff, friendly environment, state-of-the-art equipment, outrageous contests and a fun, motivational rewards system.

It is a unique and awesome responsibility to be a piece of the puzzle in helping a person smile.

Thank you for allowing us to help make you smile!

A Magical Christmas

A Magical Christmas

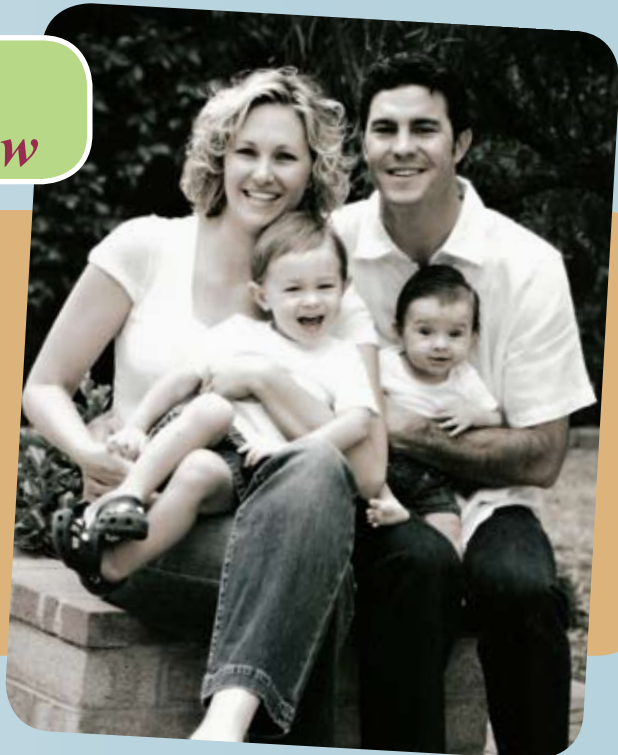

Community service as always lifts the spirit of the giver as well as the receiver. A family adopted through El Rio had a magical Christmas through the efforts of Leber

Orthodontics. The family consisting of a mother, father, three children and two grandchildren each received a brand new outfit. In addition each child was given a special toy. Leber Orthodontics also participated in Race for the Cure and donated food for the Community Food Bank.

Dr. Eric Leber's Family Continues to Grow

In February 2007 we welcomed Dawson Mitchell, our second son, into the world. Arriving nine days early with a full head of black hair and a contagious, winning personality, Dawson continues to thrive and loves playing with big brother Denton. At three, Denton loves puzzles, anything to do with Thomas the Train, and interacting with the family dog.

A Team Approach

Before

After

Undersized teeth

This patient was very concerned with the appearance of her smile and the amount of lower crowding, making her teeth difficult to clean. Braces were indicated to correct the misalignment of teeth and crowding. Before treatment was started, Drs. Leber realized that her upper lateral incisors were undersized or too narrow. For ideal esthetics and function of her anterior bite, her upper lateral incisors needed to be wider. Drs. Leber discussed with her

general dentist the different options. Both the general dentist and Drs. Leber agreed that these teeth needed to be wider, so space was left on both sides of the two undersized teeth. After the braces were removed, the general dentist then built up these teeth. What an amazing difference in her smile! In this case having a team approach of the general dentist and orthodontist working together greatly benefited her overall result.
