

Leber Orthodontics

Larry Leber DDS, MS • Eric Leber DDS, MS

A Family Tradition

Overview 2013

It's A BIG DAY!

Every patient has a story...it all starts at our first appointment at Leber Orthodontics where we are welcomed warmly and given a plan and length of treatment for that perfect SMILE! During the course of treatment we have our braces placed and then monthly adjustments are done.

Finally it is time for the BIG DAY...the braces are finally removed and the "smile" reveal is minutes away! With mounting excitement, the patient greets the doctor and staff. Then, Dr. Leber checks the bite for the final time, removes the braces, takes impressions for retainers and polishes the teeth. With the staff singing "The braces are removed today!" "The braces are removed today," the patient are treated to special treats such as M&M's and snickers and, of course, they can redeem all those precious tokens with wonderful prizes. What a perfect BIG DAY!

Thank you for giving us that opportunity to achieve your BIG DAY at Leber Orthodontics! We challenge you to embrace life with fun and confidence with your new, winning SMILE....

Tooth Talk

Invisalign

Invisalign uses a series of invisible, removable, and comfortable aligners that no one can tell you're wearing. So you can smile more during treatment as well as after. Invisalign is made with 3-D computer imaging technology and has been proven effective.

Before

After

In this case, we corrected an anterior open bite (Where the front teeth are not touching). What an amazing transformation.

Early Treatment

The American Association of Orthodontists recommends that your child get an orthodontic check-up no later than age 7. While your child's teeth may appear to be straight, there could be a problem that only an orthodontist can detect.

Before

After

In this case, Jack had an underbite (upper front teeth are behind the lower teeth). It was so severe you couldn't see his front teeth because they were hiding behind his lower teeth.

Adult Braces

Adults are the fastest growing population of patients seeking orthodontic care. In fact, about one in every five orthodontic patients today is over age 18. Adult treatment is very similar to standard adolescent treatment. With adult patients, we truly listen to the patient's chief complaint and concentrate our efforts in addressing these main concerns.

Before

After

In this case, Paul had a severe deep bite (Upper front teeth excessively overlap the lower front teeth which leads to excessive wear of the front teeth) and severe lower crowding.

OUR TEAM!!

Our staff “plays together” along with helping you achieve beautiful straight teeth and that perfect smile! With matching tie-dyed shirts Leber Orthodontics rocks the San Diego Orthodontic Convention with enthusiastic participation at the guitar-playing and dancing contests! Our annual Bowling Party is always a hit with healthy competition among the teams. And the Christmas “White Elephant” highlights such fun gifts as an U of A little fan tailgate table, “mac” make-up, and a festive Christmas arrangement.

Smiles AHEAD

Orthodontic Program

"SMILES AHEAD," the orthodontic program for underserved families started by Dr. Eric and Dr. Larry in 2012, is in full swing at St. Elizabeth Dental Clinic. Currently, we are helping eighteen patients achieve a beautiful, healthy smile. The educational component of SMILES AHEAD has been equally successful with patients bringing in positive reports on their language arts and math progress.
